

# GLOBAL NEED CREATED A PRODUCT

Clean Touch Medical LTD manufactures antibacterial solutions for use in various fields. Our objective is to eliminate viruses and bacteria from contact surfaces and thus break the infection chains at the earliest possible stage. We want to create not only efficient products, but also fast-acting products. Hours or minutes are not enough for us, viruses and bacteria must be eliminated within seconds.

“ *We want to create a new standard of protection against viruses and bacteria.* ”

Our objective is to create a range of easy-to-use products that ensure better hygiene of the contact surfaces. The temporary protective coating we have developed reduces the need for cleaning, as the coating automatically eliminates bacteria and viruses. People no longer have to disinfect their hands all the time to be safe from the microbes on the contact surfaces.

### WHY PROTECT CONTACT SURFACES?

Bacteria and viruses spread quickly from the contact surfaces, so only thorough cleaning after each individual, that is nearly impossible, would ensure a clean microbial-free surface for the next person.

We wanted to solve this problem. Effective elimination of infection chains requires efficacy in seconds. **Our protective coating eliminates bacteria and viruses in seconds and breaks**

**the infection chain right away.** It is no longer necessary to clean the surface between contacts, even if the first contact carries a disease bacteria or virus on their hands.

CTM ViralCoating is the most effective temporary protective coating on the market. It eliminates most common viruses and bacteria such as;

- SARS-CoV-2 -virus (latest form of coronavirus)
- H1N1 (influenza A)
- RSV
- Salmonella
- Listeria
- etc...

CTM created a new standard of protection. **THIS IS NOW THE NEW NORMAL!**

## PRODUCT FAMILY
