

www.cscwindowfilms.co.uk

CSC Window Film is extremely pleased with the product **Clear 1UVC**. Our work involves protecting valuable treasure, paintings and furnishings within The National Trust, The National Trust for Scotland, English Heritage, Stately Homes and the Historic House Association.

Most of our properties are monitored by Curators and Archivists and the UV is regularly checked to ensure the UV is not at a damaging level.

We also work to the National Trust Code of Practice for collection conservation in situ, which determines the amount of light allowed into a Heritage property.

The film is nice to work with on top of being optically clear – We @ CSC Window Films would not buy any other product on the market but CLEAR 1 UVC from Solar Screen®.

Regards,

Jed Southgate
